

IKappaID Phone Shop

Editing Buy & Sell Lists

A short guide for server admins and players who want to customize what the shop offers.

What controls the shop?

The game reads three text files inside the mod:

File	What it does
buy_list.txt	Items players can buy from the shop
sell_list.txt	Items players can sell to the shop
currency_list.txt	Cash, bundles, and jewelry used as payment

Path inside the mod:

```
Contents/mods/IKappaID_PhoneShop/42/media/phoneshop/
```

On a dedicated server, edit the files in your Workshop/mod folder, then restart the server.

Line format

One item per line:

```
itemType|label|price|category
```

Part	Meaning	Example
itemType	Full game item ID	Base.Bread
label	Name shown in the shop UI	Bread
price	Cost in shop dollars	5
category	Tab in the shop	Food

Example lines:

```
Base.Bread|Bread|5|Food
Base.Axe|Axe|120|Tools
Base.Pistol|Pistol|800|Weapons
```

- Lines starting with # are comments (ignored).
- Bad lines (wrong format or unknown category) are skipped silently.
- Restart the game or server after saving changes.

Buy vs sell

- Buy list: price the player pays to receive the item.
- Sell list: price the player receives when selling the item.

An item can be in buy only, sell only, or both. Common setup: sell price is about 20% of buy price (shop markup).

Example (same item, both lists):

```
# buy_list.txt
Base.Hammer|Hammer|50|Tools

# sell_list.txt
Base.Hammer|Hammer|10|Tools
```

Valid categories

Use exactly one of these (spelling matters):

```
Weapons, Ammo, Weapon ACC, Food, Tools, Medical, Vehicle Parts, Armor, Clothes
```

These match the category tabs in the shop UI.

Modded items

You can list items from other mods if you know their full ID:

```
MarzGuns.AK47|AK-47|2500|Weapons
```

- If that mod is not enabled on the server, the item is hidden in the shop.
- For a vanilla-only server, stick to Base.* items.

Tips

- Find item IDs with debug/spawn tools, wiki, or existing list lines.
- Start small: add a few lines, test in-game, then expand.
- Keep backups before big edits.
- Dedicated MP: edit on the server mod copy; all players use the same lists.

Currency (optional)

currency_list.txt defines what pays for trades:

```
itemType|worth
Base.Money|1
Base.MoneyBundle|100
Base.Necklace_Gold|30
```

Only edit this if you want to change accepted payment types or jewelry values.
